AMED\srmc all mtf ops
>
> REOCCURRENCE: 0
>
> TASK:
> SUSPENSE: Monday, 26 MAR 12 at 1200hrs Central Time
>
> SUBJECT: Review of Mefloquine Prescribing Practices
>
> SRMC STAFF Assistance POCs:
>
> LEAD: SRMC Clinical Operations
>
> ASSIST: SRMC Readiness Division and SRMC Preventive Medicine Consultant
>
> SRMC MTF Leadership (DCCs/PM/OPS)
>
> 1. TASK: Review current quality assurance procedures for the use of mefloquine
and provide results of review to SRMC Clinical Operations at
srmclinicaloperations@amedd.army.mil NLT Monday, 26 March 2012 at 1200 hrs
Central Time.
>
> 2. PURPOSE: The Assistant Secretary of Defense (Health Affairs) requested
each Service to review procedures for the use of mefloquine at military treatment
facilities, pre-deployment processing locations, and deployed locations.
>
> 3. BACKGROUND: Some deploying Service members may be prescribed mefloquine
for malaria prophylaxis without appropriate documentation in their medical
records and without proper screening for contraindications. Additionally, not
all individuals are given the FDA required mefloquine medication guide and wallet
card. DoDI 6490.03, "Deployment Health", 11 August 2006, requires all Force
Health Protection prescriptions to be dispensed by prescription and that the
prescriptions are recorded in individual medical records.
>
> 4. COORDINATING INSTRUCTIONS:
> a. Special Instructions:
>

> (1) MTFs review 25 individual records or 20% of total records, whichever is greater, and provide information on the following categories:

- > (a) Documentation of screening for contraindications
- >
- > (b) Documentation of patient education
- >
- > (c) Documentation of mefloquine prescriptions in medical records
- >
- > (d) Confirmation that healthcare providers have been informed of mefloquine screening and documentation requirements
- >

> (2) Identify deficiencies

>

> (3) Develop measures to correct deficiencies

>
